

# Quotes and Notes: Citing Material in *Monatshefte* (11/12/03)

## Quotations and Citations

When quoting or referring to specific pages within the work under review, cite the page number(s) within parentheses, *omitting* the abbreviations "p." for page or "S." for Seite. Place commas and periods inside quotation marks in both English and German texts. Mark material *you* have omitted in a quote by a bracketed ellipsis [...]. We use double “smart” quotes to indicate quoted material. All quotes, even in German texts, are American-style *upper* quotes. Titles of books, contrary to MLA style, are placed in italics. They are not underlined.

## Endnotes

*Monatshefte* uses endnotes, not footnotes. References in endnotes differ from those in bibliographies. Guidelines differ for initial and subsequent notes of the same work. Complete bibliographic information is given in the initial citation. In subsequent citations only the last name of the author and the title are given along with the page number(s).

## Bibliographic information in Endnotes

Our bibliographic style in endnotes is similar to that used in the *MLA Handbook* (6th Edition) for Works Cited, with several changes. The author's name is separated from the title by a comma, and the author is listed *First Name Last Name*. While we use quotation marks around the titles of articles, poems, etc., we use italics (not underlining) to mark the titles of books. Publication information is enclosed in parentheses. The general format is: Name, Title, (Publication information).
